• Less than \$500,000.

<sup>1/</sup> Excludes public debt retirements.<sup>2/</sup> For further details, see Table 2.<sup>3/</sup> For further details, see chapter on Customs Statistics.

<sup>4/</sup> Beginning July 1940, amounts representing appropriations equal to collections of Social Security taxes under the Federal Insurance Contributions Act for old-age insurance (less reimbursements to the General Fund of the Treasury for administrative expenses) have been deducted from total budget receipts in the Daily Treasury Statement to arrive at a figure called net receipts. Such deduction items are reflected under trust account receipts as net appropriations to the Federal Old-Age and Survivors Insurance Trust Fund. In the above statement, similar treatment has been accorded net transfers to the Federal Old-Age and Survivors Insurance Trust Fund (formerly Old-Age Reserve Account) made during the fiscal years 1936 to 1940, in order to facilitate comparison with later periods.

<sup>5/</sup> For further details, see Table 3.<sup>6/</sup> For further details, see Table 4.<sup>7/</sup> For further details, see Table 5. Also see footnote <sup>4/</sup>.<sup>8/</sup> Total expenditures less net receipts.<sup>9/</sup> Represents retirements required by law chargeable to the Sinking Fund, and retirements under special provisions of law from other funds.

<sup>10/</sup> Includes partial return of amounts paid to the Commodity Credit Corporation for the restoration of Capital Impairment - \$44 millions; and the repurchase by Federal savings and loan associations of the Treasury Department's investment in their shares - \$10 millions.

<sup>12/</sup> Receipts from capital stock and paid-in surplus reductions that are available to be released under existing law are not reflected under receipts, but rather are included as negative items under expenditures. During the fiscal year 1941, reductions in capital in this manner were as follows: Under general expenditures: Banks for cooperatives - \$60 millions, and Federal land banks - \$100 millions; under revolving funds: Federal Farm Mortgage Corporation - \$100 millions, Federal Intermediate credit banks - \$40 millions, and production credit corporations - \$15 millions; a total of \$315 millions.

1/ Beginning July 1940, amounts representing appropriations equal to collections of Social Security taxes under the Federal Insurance Contributions Act for old-age insurance (less reimbursements to the General Fund or the Treasury for administrative expenses) have been deducted from total budget receipts in the Daily Treasury Statement to arrive at a figure called net receipts. Such deduction items are reflected under trust account receipts as net appropriations to the Federal Old-Age and Survivors Insurance Trust Fund. In the above statement, similar treatment has been accorded net transfers to the Federal Old-Age and Survivors Insurance Trust Fund (formerly Old-Age Reserve Account) made during the fiscal years 1936 to 1940, in order to facilitate comparison with later periods.

2/ Excludes public debt retirements.

3/ Total expenditures less net receipts.

<sup>1/</sup> In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

Basic of Computation: (1) Treasury bond yields are computed on the basis of the mean of bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: See "Treasury Bulletin" for July 1941, pages 21-26, and subsequent issues.

5/ On days when the exchanges are closed, the date and prices of the previous day are used.

6/ Indicates change in composition of Treasury bond average.

7/ Holiday.

## YIELDS OF TREASURY BONDS AND NOTES DEC. 15, 1941

Based on Mean of Closing Bid and Asked Quotations

*Note* For callable bonds,  $Y_{CH}$  are computed to, and issues plotted as of, the earliest call date if the bond is selling above par, and as of the final maturity date if the bond is selling below par. The smooth curves are fitted by eye. Dollar amounts shown in descriptions of issues are in millions. Issues for which an exchange offer has been made and has expired are excluded. Curves reflect the yields of taxable and partially tax-exempt bonds respectively, and of wholly tax-exempt notes.

Back Figures: Annual Report of the Secretary of the Treasury for 1941.

- <sup>1/</sup> The "total amount outstanding" of the several issuers differs from the gross indebtedness of these issuers in that the former excludes non-interest-bearing debt. The "total privately-held securities" differs from the net indebtedness of the borrowers in several additional respects. The former is derived by deducting from the total amount of interest-bearing securities outstanding, the amount of all securities held by the United States Government, Federal agencies, Federal Reserve Banks, and by all public sinking, trust, and investment funds. Net indebtedness, on the other hand, is derived by deducting from the gross indebtedness an amount equivalent to the total volume of sinking fund assets of the respective borrowers, but makes no allowance for any other public assets.
- <sup>2/</sup> Securities the income from which is exempt from both the normal rates and the surtax rates of the Federal income tax.
- <sup>3/</sup> Securities the income from which is exempt only from the normal rates of the Federal income tax. In the case of partially tax-exempt Treasury bonds and United States savings bonds, interest derived from \$5,000 aggregate principal amount owned by any single holder is exempt from the surtax rates as well as the normal rates of the Federal income tax.
- <sup>4/</sup> Securities the income from which is subject to both the normal rates and the surtax rates of the Federal income tax.
- <sup>5/</sup> Includes Exchange Stabilization Fund.
- <sup>6/</sup> This figure is taken from Treasury Form 774, "Statement of the Public Debt of the United States". It differs from the corresponding figure in the Daily Treasury Statement which is used elsewhere in the "Treasury Bulletin" by including certain items in transit.
- <sup>7/</sup> Includes \$302 millions of guaranteed obligations sold directly to the Treasury, and \$8 millions of Tennessee Valley Authority bonds issued "on the credit of the United States" and held by the Reconstruction Finance Corporation.
- <sup>8/</sup> Includes bonds of joint stock land banks, the only Federal instrumentalities which are not Federal agencies but which have tax-exempt securities outstanding.

1/ Comprises criminal cases of the Alcohol Tax Unit of the Bureau of Internal Revenue, the Bureau of Customs, the Bureau of Narcotics, the Secret Service Division, and the income tax and miscellaneous tax cases referred by the Penal Division of the Bureau of Internal Revenue to the Department of Justice with recommendation for criminal prosecution.

2/ Comprises cases transferred to state, local, or other authorities for prosecution and cases closed because of duplicate prosecutions.

3/ Cases "otherwise disposed of" consist of Customs and Narcotics cases in which no arrests were made and Secret Service cases which were disposed of by lunacy hearings.

4/ Insufficient cases to warrant showing comparative percentages.

5/ Percentages do not add to 100 because a single conviction may involve more than one type of sentence.

6/ Alcohol Tax Unit figures are based on cases in which a suspended or probationary sentence only was imposed.
